Learning Report of Git and OOPs

Git

Git & GitHub Learning Report

🔹 Setup

- Installed Git Bash and created an account on GitHub
- Configured Git using: git config --global user.name `"sksingh051"`
  git config --global user.email `sksingh051@outlook.com`
- Generated and added SSH key for authentication

Repository Creation

- Created repository: [fullStackInternTraining-sksingh]
- Created folder [Phase01_Git_OOP]for Git-related tasks
- Added `tablePrinting.js` and committed it to the `main` branch

Git Commands Practiced

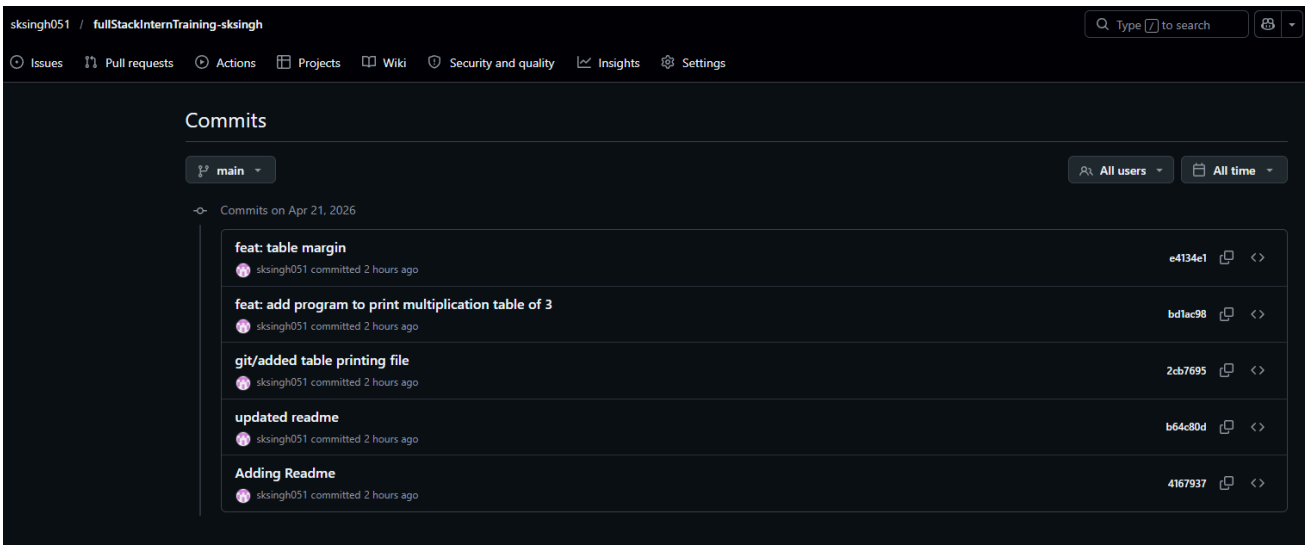
- `git init`
- `git add <file>`
- `git commit -m "message"`
- `git remote add origin <repo-link>`
- `git push -u origin main`

Branching & Merging

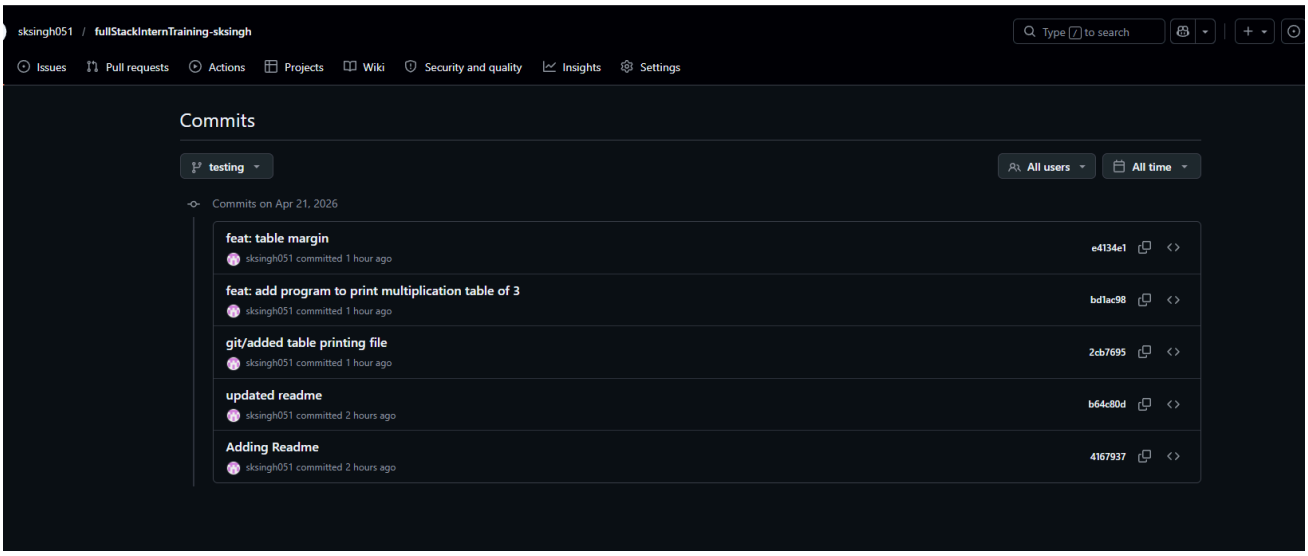
- Created a new branch `testing`
- Made changes in the branch and merged it into `main`
- Commands used:

```
git switch -c testing
git switch testing
git merge testing
```

- List of commits on both branch:
- Main Branch



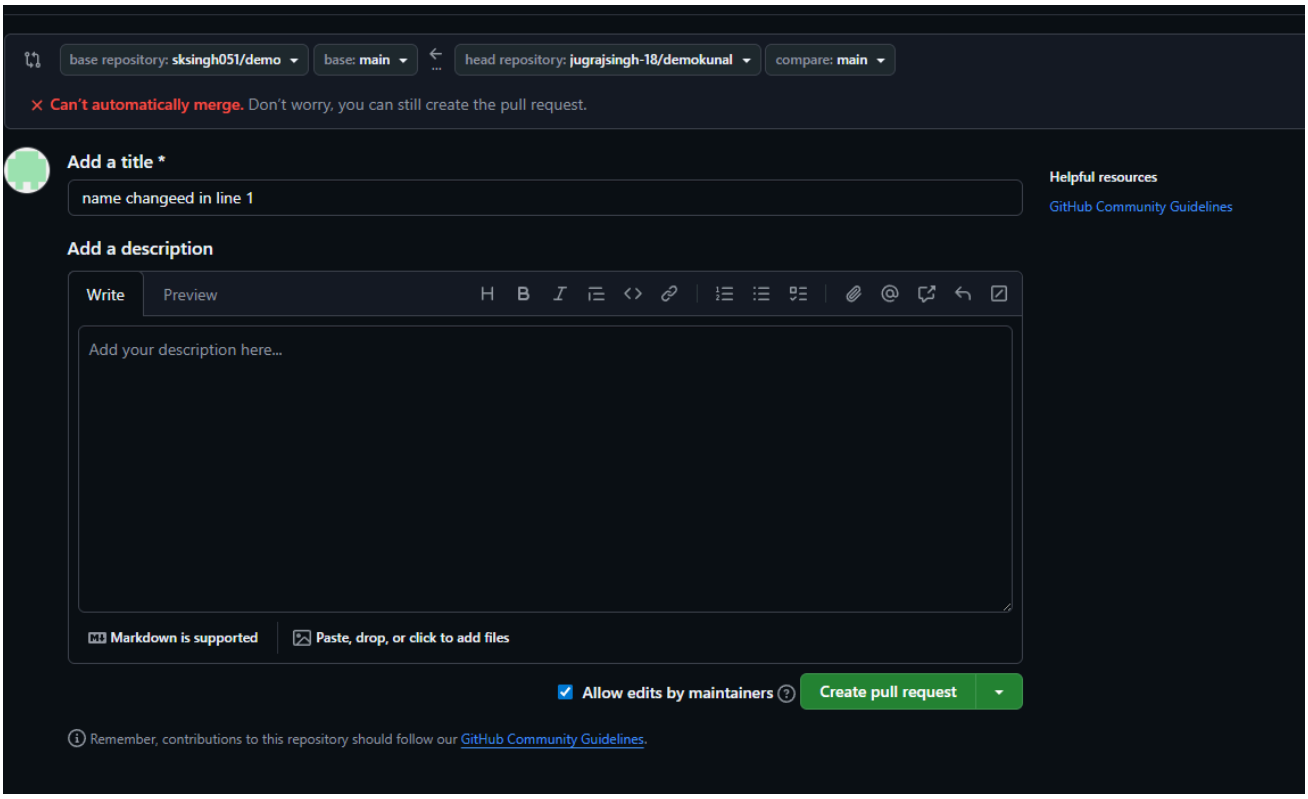
- testing branch



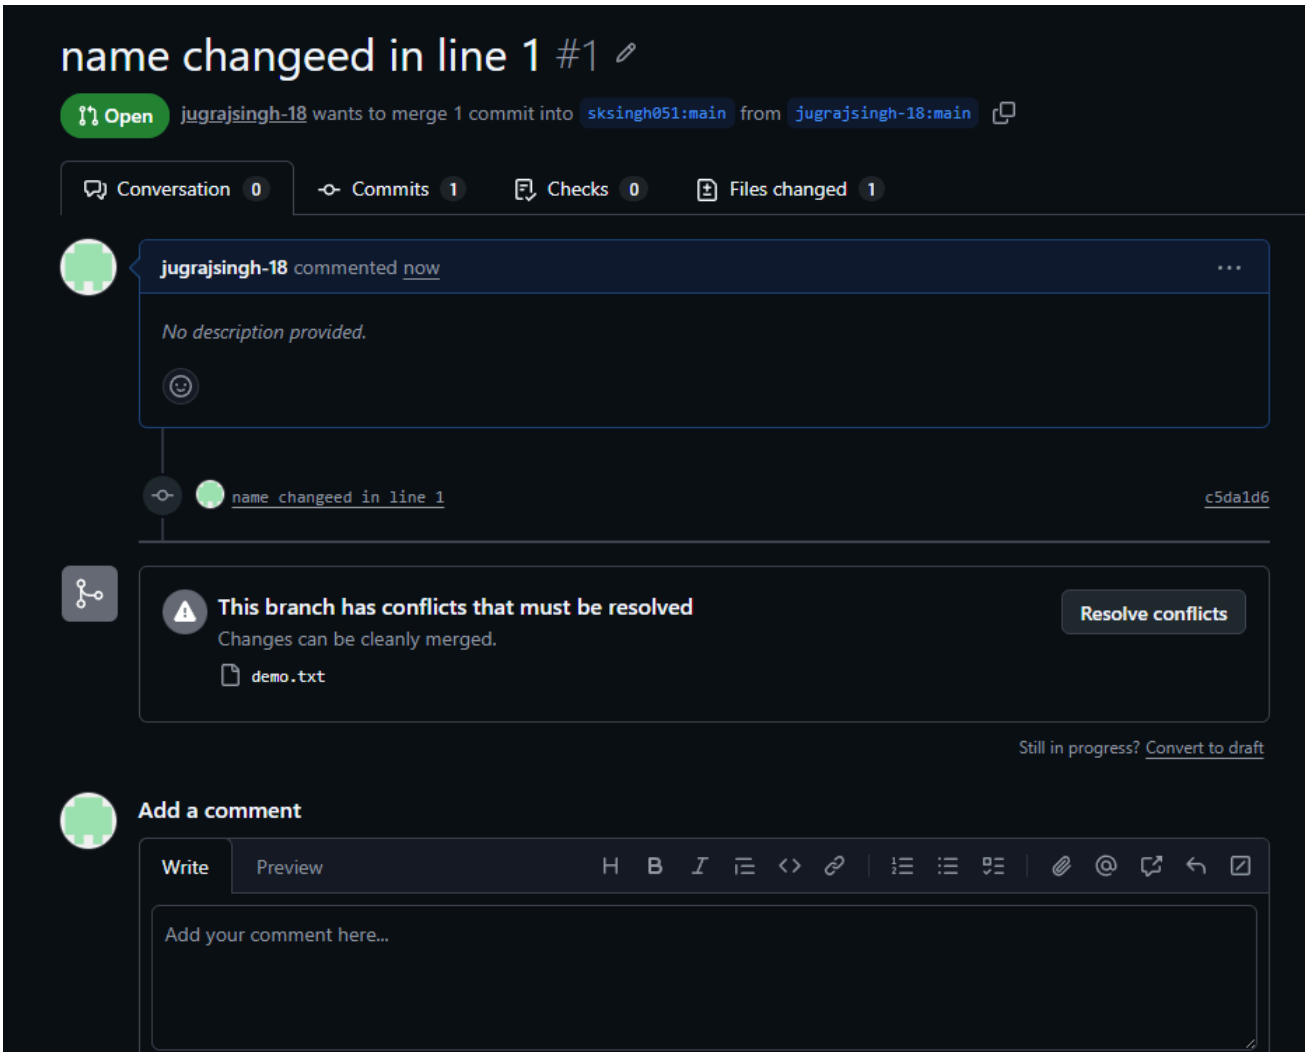
Merge Conflict Resolution

- Collaborated with a teammate on a shared repository
- Both contributors modified the same file, leading to a merge conflict
- Conflict occurred during merge with the base branch

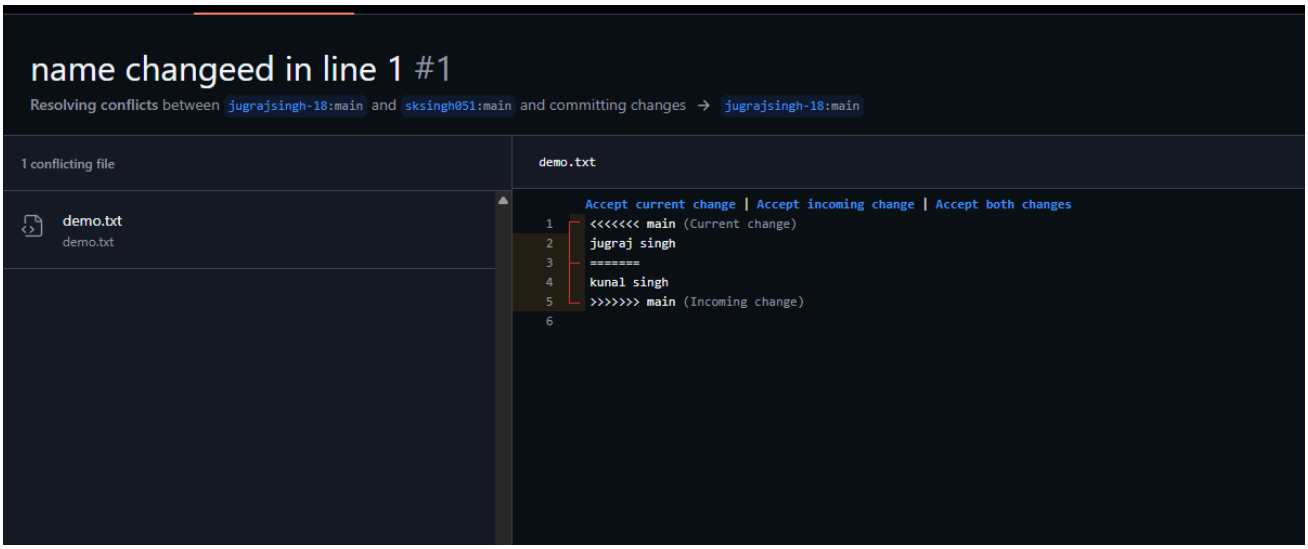
- Try to merge with the base branch , failed due to Merge Conflict



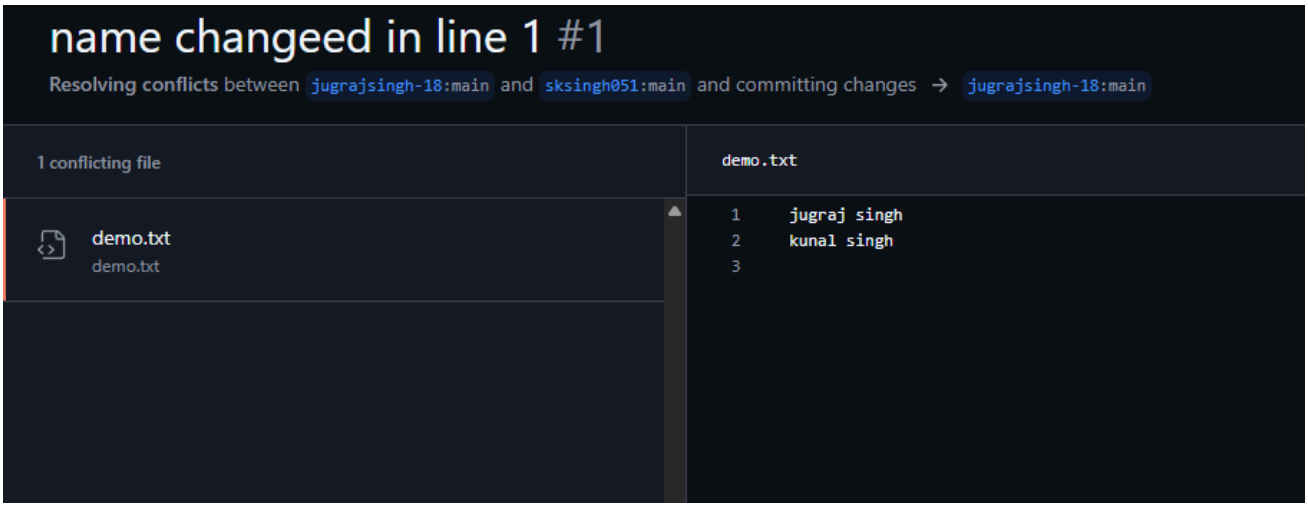
- Solve the conflict by clicking the Resolve conflict



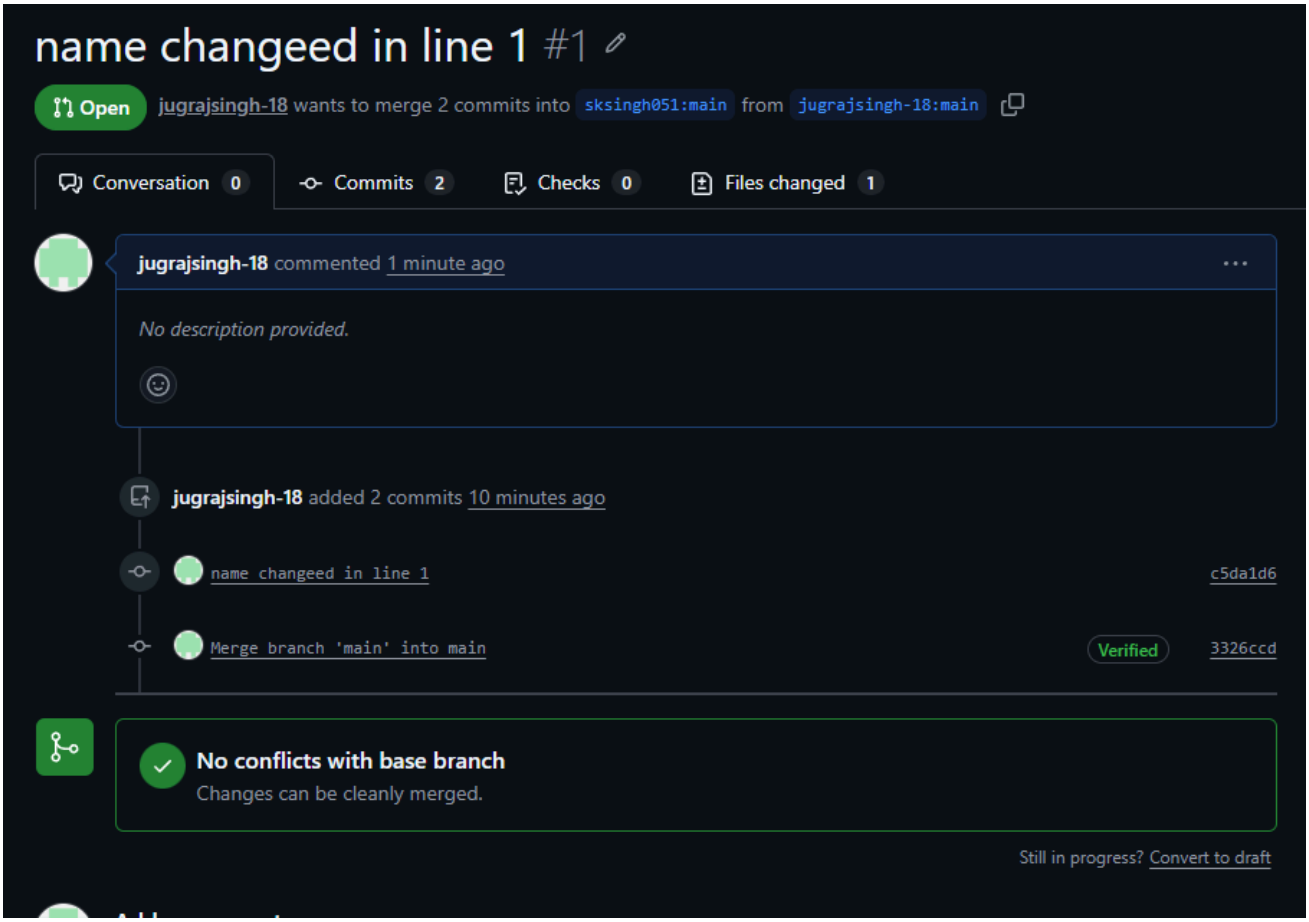
-
- Accept both changes to keep the incoming code of both members

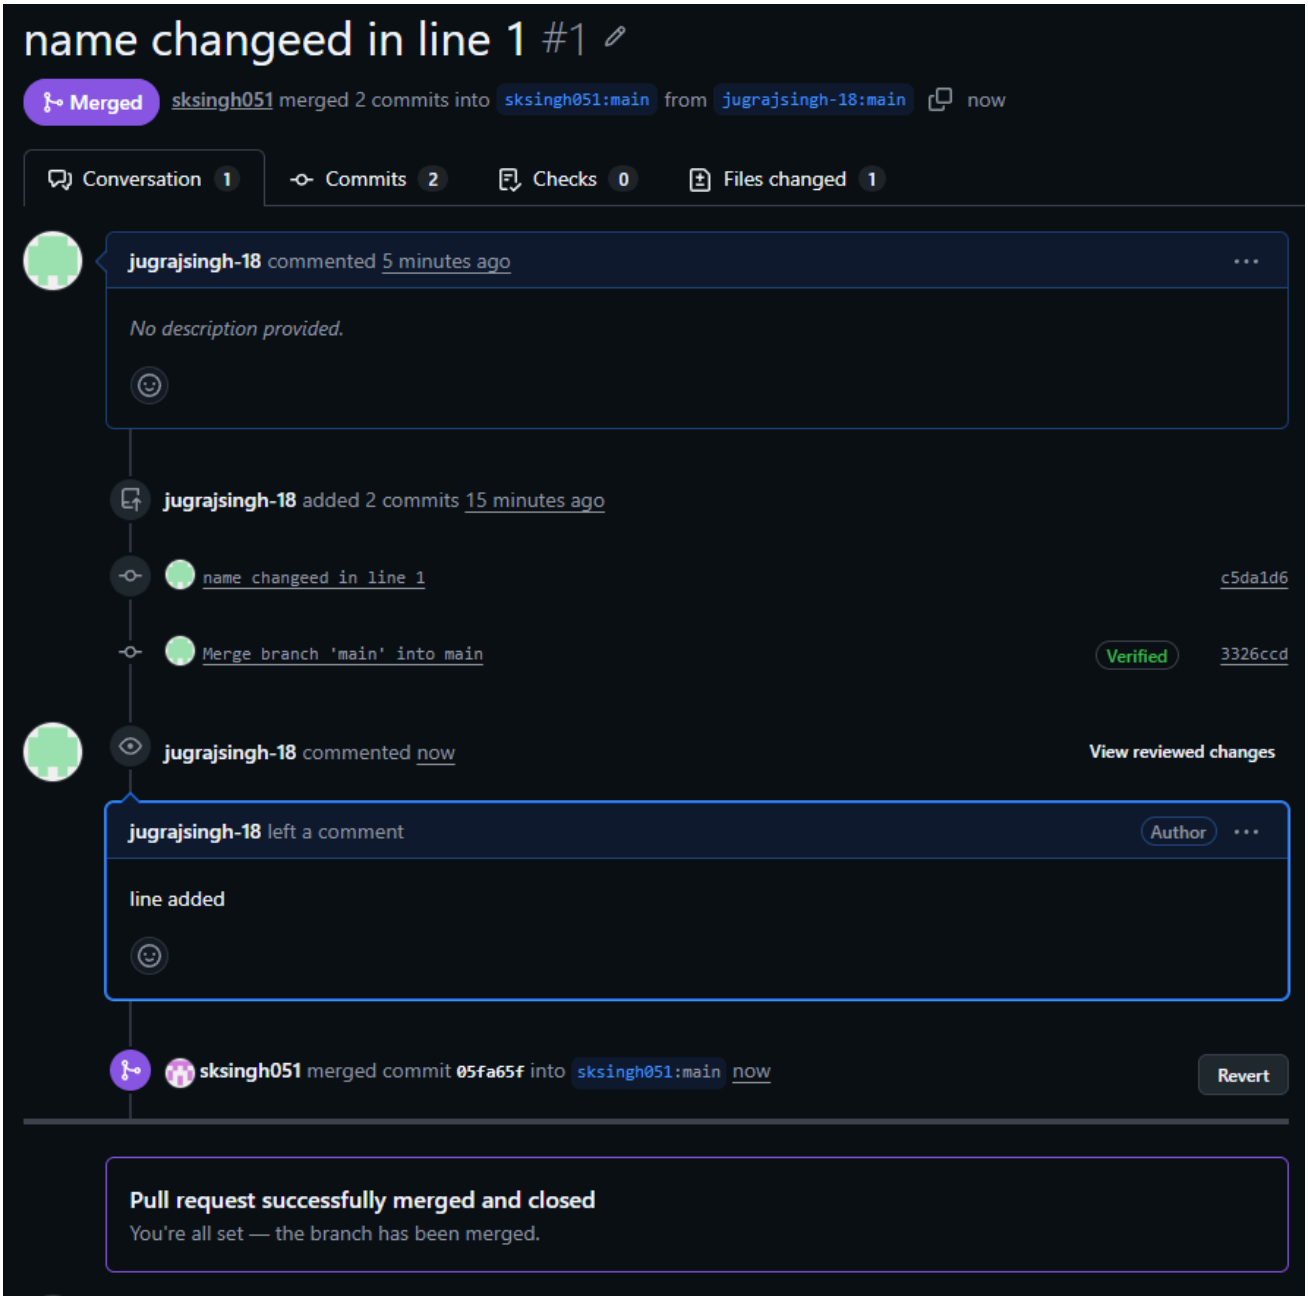


-
- Conflict Resolved



- After accepting both incoming changes manually No conflict with base branch



-


- Successfully Merged with the Base branch
